Portfolio: <https://soumen.trails.click>

Location: Bangalore, India

PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience in Java backend development, system design, and microservices architecture. Specialized in building scalable, fault-tolerant, and high-availability backend systems using Java, Spring Boot, and AWS. Strong experience in designing REST APIs, data models, distributed workflows, and asynchronous messaging systems. Proven ability to optimize performance, ensure system reliability, and support production-grade applications. Working knowledge of React.js.

TECHNICAL SKILLS

Languages: Java, Javascript, CCL

Backend & Architecture: Spring Boot, Microservices, REST APIs, System Design, Distributed Systems

Cloud & DevOps: AWS, DynamoDB, SNS, SQS, Lambda, EC2, S3, CloudWatch, CI/CD, Jenkins, Git, Argo CD, Docker, Kubernetes

Databases: DynamoDB, PostgreSQL, Oracle SQL, Redis

Messaging & Streaming: Kafka, AWS SQS, AWS SNS

Testing: JUnit, Mockito, Karate

Monitoring & Logging: Splunk, Grafana

AI: Claude Skill, Agentic AI, MCP, Cursor

Frontend (Basic): HTML, JavaScript, CSS, React.js

PROFESSIONAL EXPERIENCE

Software Engineer

Dexian India Technologies Pvt. Ltd. | Client: Intuit | Apr 2024 – April 2026

- Designed system architecture and backend services for a centralized notification platform.
- Built scalable microservices using Java and Spring Boot following domain-driven and cloud-native principles.
- Designed REST APIs, data models, and asynchronous workflows using AWS SQS-SNS and Kafka.
- Enabled multi-language notification delivery through a scalable localization framework using AWS DynamoDB, SNS-SQS and S3.
- Automated CI/CD pipelines using Jenkins, Argo CD and GitHub.
- Implemented monitoring, logging, and alerting using Splunk and CloudWatch.

Tech Stack: Java 21, PostgreSQL, AWS, DynamoDB, SNS, SQS, Lambda, S3, CloudWatch, EC2, Jenkins, Splunk, Docker, Kubernetes, Argo CD

Software Engineer II

Oracle Cerner Healthcare Solutions | June 2020 – Apr 2024

- Contributed to system design and backend development of enterprise healthcare platforms, Bedrock.
- Designed and implemented Spring Boot microservices and core Java APIs.
- Participated in architectural discussions focusing on scalability, performance, and reliability.
- Improved system performance through query optimization and service refactoring.
- Integrated CI/CD pipelines and automated testing in Agile environments.

Tech Stack: Java 8, Oracle SQL, AWS, DynamoDB, Lambda, S3, CloudWatch, EC2, CI/CD, Jenkins, Splunk

Software Engineer

Allegis Services India Pvt. Ltd. (TekSystems) | Client: Oracle Cerner | Jan 2020 – June 2020

- Contributed to system design and backend development of enterprise healthcare platforms, Bedrock.
- Designed and implemented Spring Boot microservices and core Java APIs.
- **Converted to full-time employee at client Oracle Cerner within 5 months due to strong performance and project impact.**

Tech Stack: Java 8, Oracle SQL, AWS, DynamoDB, Lambda, S3, CloudWatch, EC2, CI/CD, Jenkins, Splunk

Software Engineer

National Informatics Centre (NIC) | Feb 2019 – Nov 2019

- Designed backend workflows and REST APIs for a government-scale application.
- Led migration to a new system version with improved performance and scalability.
- Optimized PostgreSQL queries and improved API response times.

Tech Stack: Java 8, MySQL, Docker, Kubernetes, CI/CD, Jenkins

Junior Software Engineer (Freelance)

Icode Solution | Jan 2018 – Feb 2019

- Designed REST-based integrations and backend customizations for CRM platforms.

KEY PROJECTS

One Intuit Notification Platform (Intuit)

- Developed backend microservices for multi-channel notifications (Email, SMS, Push, Voice, Tray).
- Designed RESTful APIs using Java and Spring Boot.
- Integrated DynamoDB for scalable data storage.
- Implemented AWS SQS and SNS for asynchronous message processing.
- Built a localization framework supporting notifications in 30+ languages.
- Implemented monitoring and logging using Splunk and CloudWatch.

Tech Stack: Java 21, PostgreSQL, AWS, DynamoDB, SNS, SQS, Lambda, CloudWatch, EC2, Jenkins, Splunk, Docker, Kubernetes, Argo CD

Bedrock – Healthcare Platform Build Tool (Oracle Cerner)

- Designed and developed core Java APIs for healthcare reference data.
- Built Spring Boot microservices to improve modularity and scalability.
- Automated builds and deployments using Jenkins CI/CD pipelines.

Tech Stack: Java 8, Oracle SQL, AWS, DynamoDB, Lambda, CloudWatch, EC2, CI/CD, Jenkins, Splunk

TrackChild 3.0

- Led system migration and performance optimization.
- Designed REST APIs for improved interoperability.
- Optimized PostgreSQL queries resulting in faster response times.

Tech Stack: Java 8, MySQL, Docker, Kubernetes, CI/CD, Jenkins

EDUCATION

Master of Computer Applications (MCA)
Heritage Institute of Technology, Kolkata
Maulana Abul Kalam Azad University of Technology, 2018
CGPA: 8.36

Bachelor of Science in Computer Science (Honours)
Michael Madhusudan Memorial College, Durgapur
Burdwan University, 2014
Percentage: 71.3%

ADDITIONAL INFORMATION

- Languages: English, Hindi
- Availability: Open to backend and full-stack (backend-heavy) roles
